True Innovation

With patented technologies, Armada continues its ambition of increasing performance and safety on the roads.

Tested Quality

25 different tests including all processes starting from raw materials to the final product allow us to offer defect-free and weather-resistant products.

Comfort and Safety

These air suspension systems guarantee perfect road-holding in any conditions and ensure drivers enjoy a comfortable and safe journey.

Premium Quality Comes Standard

- All rubber is formulated and processed in-house to ensure standardized level high level of quality
- Air springs work perfectly under all kinds of weather conditions enabling a safe journey every time
- Long-lasting and oxidation-resistant. All metal parts are coated and pistons made from composite materials provide lighter and stronger products. All part numbers carry a one-year warranty
- Air springs, which are produced with CR rubber, are heat, solvent, and oil-resistant while enabling easy assembly
