

Canada  Powertrain

The Powertrain Specialists

For Over 35 Years

Your HD Drivetrain Guide

WE ARE HEAVY DUTY

Canada Powertrain is one of the nation's largest independent distributors of heavy duty truck and trailer parts with coverage across Canada. Get the right parts, right now with access to 200,000 products from over 100 industry-leading manufacturers. Our local Distribution Centre in Mississauga can get parts to you quickly, while expert Reman and Rebuild services are sourced from our certified rebuild shop in Edmonton, Alberta.

The Parts You Need. When You Need Them.

THE BEST RELATIONSHIPS PLAY A VITAL PART

Your success and profitability in the heavy duty trucking industry is about the relationships you hold on to. These relationships keep your business and livelihood rolling.

Like you, Canada Powertrain builds lasting relationships. Our job has always been to support business owners in the trucking community, by offering exceptionally reliable truck parts, expertise, available inventory and service delivery.

WE'RE GROWING NATIONWIDE TO SERVE YOU EVEN BETTER

A rich history with the promise of great things to come. When we started out in 1983 in the heart of the GTA, our goal was to be better than the next guy down the street or, even the next county over. It's all about trust, relationships, parts on the shelf and heavy duty expertise—do the right things and you've earned a customer for life.

A lot has changed since 1983, but our know-how and passion for serving the needs of our customers hasn't wavered. Canada Powertrain's knowledgeable, experienced team of professionals earn the trust of our customers every day. Down the street or across the country, we'll put our team up against anyone.

BUILDING YOU THE MOST EXPERIENCED TRUCK PARTS AND SERVICE RESOURCE

- Founded in 1983
- The premier distributor of Eaton, Fuller, Dana, Meritor for Canada
- Reliable inventory of over 200,000 brand name heavy duty parts
- More than 100 leading manufacturers
- Industry leaders for over 35 years
- A full team of heavy duty parts professionals serving you every day

TECH TIP

TECHNICIANS OFTEN OVERLOOK THE FOLLOWING:

- **Loose Fasteners:** Always check for loose fasteners at the center bearing mounting as well as loose end yoke nuts at major components. Checking your vertical or rotational movement at these locations can prevent future failures.
- **Slip Yoke Shaft:** Check for slip yoke spline wear by simply moving the shaft up and down to gauge amount of movement.
- **Greaseable U-Joint Purging:** Make sure all four journal caps are purged during PM greasing for proper u-joint life. Not purging all four positions can lead to air pockets which prevent grease from escaping and can starve specific journal caps of grease later in life.
